

Professional Parking Solutions

## New website for ZEAG South Africa

We have just launched our new dedicated ZEAG South Africa website ([www.zeag.co.za](http://www.zeag.co.za)) with information about our South African subsidiary and parking solutions for the South African market.

Having been established in 1993, Zeag SA was the first to introduce Pay-on-Foot Parking Solutions in South Africa in 1996. Since then they have pioneered new functionality on almost all fronts. The oldest fully operational Pay-on-Foot site in South Africa is in Hatfield, Pretoria and it is nearly 14 years old which is evidence of the quality and on-going support that Zeag has provided since the system was installed. The owners of Hatfield's Zeag P900 parking system have continued to show confidence awarding a contract for the replacement of the P900 Parking system with Zeag Orion<sup>XR</sup> Magnetic Stripe Pay-on-Foot Parking system.

We hope you will frequently visit our new website [www.zeag.co.za](http://www.zeag.co.za).
